CARBON, ALBERTA

S. J. GARRETT TO BUILD NEW GARAGE

Plans have been completed by S.J. Garrett for the erection of a modern garage building on the site of his old garage and work was started this week in getting the ground levelled in order to commence on the cement floor. We understand that the new building will have a floor space of about 120 feet square and will be a two story structure of concrete, which will be entirely fire proof. Ample room will be given to storage and special show windows will be in front for the displaying of new models, while a first class repair shop will be maintained for the benefit of automobile owners. This building will be a great asset to the Village and this is just the beginning of the building of modern structures in Carbon. The Elks community hall is another building that will be going up this summer and we look for active development in the 1929 building program.

CAR DRIVERS MUST HAVE CARD

Car driver's licenses will be issued on July 1, which will have to be taken out by all drivers over 16 years of age, at a fee of 50c. No licenses will be granted to anyone under 16. Those learning to drive will have to be accompanied by a license holder while driving, the latter to sit alongside.

VERNON BOOHER HANGED YESTERDAY FOR MURDER

Vernon Booher, who was sentenced to hang last December for the murder of his mother, brother and two hired men at Manville last year, and who gained a reprieve until April 24, was hanged at the Fort Saskatchewan jail yesterday morning.

OLD AGE PENSIONS ACT IN OPERATION SOON

The Old Age Pensions Act will probably come into operation in Alberta in about a month, according to a statement made on Thursday by Premier Brownlee. The Act, it has been decided by the Executive Council, will be placed under the jurisdiction of the Workmen's Compensation Board, and arrangements are being made for this board to administer the provisions of the new Act. Under the proposed plan it is necessary for each province sharing the benefits of the Dominion legislation to submit its supplementary and contributory legislation to the Dominion Government through Hon. Peter Heenan, Minister of Labor for final ratification and to draw up a formal agreement of operation. As soon as this step has been taken it is expected the Alberta Act will come into effect. The payment of pensions will not become retroactive but will date from the time the Act is proclaimed.

GOVERNMENT NAMES UNIVERSITY HOSPITAL BOARD

The University Hospital in Edmonton will in future be under the direction of a board recently appointed by the Provincial Government. The personnel of the governing body includes Dr. R. C. Wallace, president of the University of Alberta, Dr. A. C. Rankin, Dean of the University Medical School, Dr. M.R. Bow, Deputy Minister of Health, W. B. Milne, Supervisor of Municipal Hospitals, H. H. Cooper, wholesale merchant and John Gillespie, grain trader.

A clergyman once said to a little girl: "Ethel, you seem to be a bright little girl, can you repeat a verse from the Bible?"
"I'll say I can," replied Ethel.
"Very well, my dear," answered the clergyman; "which one is it?"
"The Lord is my shepherd—I should worry!"

GOLF MEETING FRIDAY

A Meeting of the Carbon Golf Club will be held in the Municipal Office on Friday evening, April 26, at 8 p.m. sharp. All who are interested in this sport are asked to be present, as good golf is practically assured this year.

CARBON ELKS MAKE TOUR OF INSPECTION OF HALLS

Last Sunday a party consisting of Messrs. J. J. Greenan, A.F. McKibbin, Alex Burns, Henry Johnson, S. Willis, J. A. MacDonald, H. Jealous, I. Gutman, Geo. Trepanier, C. H. Nash, G. Cadman, Jas. Ramsay, and R. Shaw, made a tour of the southern towns, inspecting the different community halls with a view of getting some line on the kind of building that they would like to have in Carbon and it was found that the Elks community hall at Okotoks was about the best suitable to have in Carbon in view of the limited expenditure to be made. The members of the party visited the towns of Gleichen, Arrowwood, Vulcan, Champion, Parkland, Nanton, High River and Okotoks, returning by way of Calgary that evening to Carbon and they report an excellent trip.

The hall at Okotoks is an Elks community hall built at the expense of about \$12,000 and is of stucco construction, the building having a floor space of 38 x 80 feet. There is a full size basement with club rooms and a banquet hall and ample room is available for all needs.

It is the intention of the Carbon Elks to build a hall of about this construction, except that it will probably be ten feet larger, with a built in stage. Such a building would cost little more than the hall at Okotoks and it would be a great asset to the Village of Carbon and a monument in memory of the Carbon Elks Lodge, which would have everlasting benefit as a community builder.

United Church services will be held at the three appointments on Sunday next at the usual hours.

ADDITION TO BUICK LINE HAS BEEN ANNOUNCED

Oshawa, Ont., April 23—Announcement has been made by R. S. McLaughlin, President, General Motors of Canada, Limited, that McLaughlin Buick will add to its manufacture of Motor Cars by building a new six-cylinder automobile.

"The new car will offer a Buick-built product in a lower price field," he said. "It will be entirely different in design and appearance and will in no way replace or conflict with the established McLaughlin-Buick line. The name of the new car, together with its details, will be made public in the early summer."

ALBERTA MACARONI SHIPPED TO CHINA

The Catell Macaroni Company of Lethbridge has received an order from an Italian dealer in Shanghai, China, for the shipment of a carload of this Alberta product to that country. This consignment, the first of its kind to go from this province to the Orient, will be loaded at Vancouver on May 9th.

NEW POST OFFICES OPENED

Two new post offices have recently been established in Alberta, one at Lac Magloire in the Peace River district and the other at Morecambe in the district of Battle River. The offices at Battleview and Cheecham in the Athabasca district have been closed and the name of the Moosewa post office in the Athabasca district has been changed to Lindbergh.

LITTLE ITEMS OF LOCAL INTEREST

Mrs. L. Poxon was a Calgary visitor last week, going in on Thursday.

—See Mrs. C. Knisely for your spring sewing. 2tc

Miss Phyllis Hepburn returned on Friday from Saskatchewan where she has been spending the last couple of weeks visiting with relatives.

Mrs. Thos. Ramsay returned Sunday evening from Calgary.

Beginning this week the Carbon Bus will leave Carbon every morning at 8 a.m. and returning will leave Calgary every evening at 5 p.m. This new schedule will give visitors an hour and a half longer in Calgary.

W. Hay is having an addition made to his house and same has been practically completed.

J. J. Greenan was a Calgary visitor on Tuesday.

R. J. Falkbairn, who has been confined to his home the past couple of months with pneumonia, left last Thursday for a month's sojourn in Manitoba where he hopes to regain his health.

The Builders Hardware Store on main street has recently received a fresh coat of paint and the building looks up in contrast with the other buildings which are badly in need of this rejuvenator.

Word was received here last week that Mrs. R. Tennant, formerly of Carbon, had died in an Edmonton Hospital following an operation.

Beginning next Wednesday, May 1st all stores in Carbon must close for the usual summer Wednesday half holiday. This is a Village By-Law and must be complied with.

The Village council authorized the creation of steps leading from the road to the top of the hill between J. J. Greenan's residence and the Catholic church and same have been completed. This will be a great boon for those wishing to climb the hill, especially the golf players, who will find them a decided relief on making the descent after a weary round on the links.

CARBON TENNIS CLUB ORGANIZES FOR SEASON

(Received too late for last issue)
A general meeting of the Carbon Tennis Club was held in the Municipal hall on April 11th, eighteen members being present. The following officers were elected for the 1929 season: Honorary president, C. McPherson; President, C. H. Nash; Vice-President, V. B. Hawkins; Secretary-Treasurer, W. A. Braisher; Executive Committee: President, Vice-president, secretary, Mrs. G. G. Peters, Miss K. Ramsay and J. M. MacDonald.

It was arranged that the fees for the present season be as follows: Men, \$5; Ladies \$3; School Students \$1.00.

ELKS' PLAY

From The Acme Sentinel

The comedy-drama "Civil Service," put on by the Carbon Elks, faced a full house when the curtain rose Friday evening. After a preliminary sing-song led by Bert Fowler, the rise of the curtain showed a gossamer in full swing, mail arriving and being sorted in such realistic manner the audience had the impression they were getting a peek behind the scenes of the real thing. The play was well acted, each character being taken by one well suited to the part. The drama had its serious moments as well as its humorous and was well received by crowd which they showed by their applause. The Carbon Elks are to be congratulated for the splendid manner the play was interpreted and talent displayed. Dancing was indulged in for a couple of hours afterward, the music being supplied by the Acme Elks orchestra; this was their first appearance in Acme and made a good impression playing the latest hits in perfect time. We will hear more from them later.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

Canada's Opportunity and Responsibility

It has been said times without number that Canada occupies a paramount and responsible position as interpreter of Great Britain to the United States, and of the United States to Great Britain. Such views have been expressed, not so frequently by Canadians themselves as by leading men in Great Britain and the United States.

Within the past few years the opinion has been expressed by leading citizens of the Empire and of China, Japan, and other oriental lands, that Canada, because of its geographical position and its rapidly expanding trade across the Pacific, likewise occupies a strong position as interpreter of the Orient to the rest of the Empire. Canada is popular in China and Japan as compared with the United States and European countries.

In the councils of the League of Nations this Dominion also stands high, and deservedly so. It is recognized by other countries, and more particularly the smaller nations, that Canada has no selfish purpose to serve through its membership in the League; that, on the contrary, the Canadian attitude is one of disinterestedness, based wholly in a desire to render service to mankind. The Canadian position in the League has always been for peace, conciliation, recognition of the rights of others, and, especially, not merely fair treatment but open generosity and sympathy for minorities.

Because of this unselfish attitude, Canadians are welcome in all lands, and the high opinion entertained for this country is proving a real asset to the business and commercial interests of the Dominion in the opening and development of foreign markets for Canadian products.

Now, one of the most influential men in India, Sir Rabindranath Tagore, the world renowned poet, outlines to Canada a duty which rests upon this young Dominion, not only to itself, or to a group of nations, but to the whole world. Sir Rabindranath was a distinguished guest and speaker at the recent Conference of the National Council of Education held at Vancouver, and in his farewell message to Canada he gave expression to views which Canadians everywhere may well read, ponder over, and to which they should give heed.

"Canada," he said, "is too young to fall a victim to the malady of disillusionment and scepticism, and she must believe in the great ideals in the face of contradiction—for she has the great gift of youth; she has the direct consciousness of the stir of growth within her which should make her trust herself, which is the only sure way of trusting the world."

How true this last sentence! A man or a nation which does not trust himself or itself, but lives in an atmosphere of fear and suspicion, can never trust others.

Continuing, this great Indian savant said: "Let Canada feel the sacred dawn of her life, that the expectation of human destiny is upon her as upon other sister countries which have just entered into the cycle of their promise. Canada will have to solve for the salvation of man the most difficult of all problems, the race problem, which has become insistent with the close contact of communities that had their isolation for centuries in their geographical and cultural exclusiveness. Canada will have to reconcile the efficiency of the machine with the creative genius of man which must build its paradise of self-expression, reconcile science with religion, individual right with the social obligation that it must acknowledge. She must dream of the introduction of honesty even in politics, which is the self-interest of the nation, knowing that such interest can only have its sure foundation in international friendships. She must ever hope to be able to win the heart of the world by offering the best that she produces."

Although his actual knowledge of this country was limited, Sir Rabindranath said Canada possessed powers of character and material resources that would enable her to carve out a destiny free from "the fatigue that old civilizations suffer from in the shape of cynicism."

This is an inspiring vision of Canada's place in the world. It is one that calls for the best that every citizen, regardless of his race or creed, can contribute. And it is because the Canadian people of tomorrow will be a development of the cosmopolitan population of today that the Canada of the future will find within itself the ability, the sympathy, the international viewpoint, which will make possible such a great contribution to the future of mankind and the ultimate and lasting peace of the world, for, until the race problem is solved there can be no peace in any country, or in the world at large.

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

Ontario Man Inherits Title

Will Go To France To Take Possession Of Property

Count Richard du Manoir de Jauvay has lived for 25 years in one-half of a frame house in the village of Westmeath, near Pembroke, Ontario. All that time he has known he was next in line to the family estates and titles, together with the fine old Norman chateau. The property which has now fallen to the Count on his succession to the family title is situated near Bayeux and it is his intention to leave Westmeath for France and his ancestral home together with the Countess and their son and heir.

The Count, who acted as house painter and general handy man in the unpretentious village of Westmeath, was known as Richard Du Manoir. This is the second European title to be inherited by a Canadian within the past few weeks, the other case being that of the Earl of Egmont former rancher of Priddis, Alta.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

Germany's Unusual Club

There are numerous "crime clubs" in Germany in which for a small initiation fee and monthly dues are provided tools and disguises for the commission of any "job" on hand. Money is advanced for railway fares and competent lawyers provided.

FEELING TIRED AND DEPRESSED

Then Try the Treatment With Dr. Williams' Pink Pills

It is good to be tired after hard work or play. Rest and food will banish that kind of a tired feeling. But to be weak all the time never to feel strong and vigorous, to be breathless at the least exertion, denotes a condition of ill health that must be corrected or worse results will follow. Such a condition the doctors term anemic, and is caused by thin blood. For relief in this condition nothing else can equal Dr. Williams' Pink Pills, which enrich and purify the blood, bringing new health and strength. Among those who have found new health through the use of these pills is Mr. G. E. Hooton, R.R. 4, Elgin, Ont., who says:—"For a long time I was greatly disturbed with pains in my back and felt tired and depressed most of the time. My blood seemed to be in a bad condition, so much so, that I slept poorly and scarcely felt like eating. I tried a doctor, but his treatment did not help. Then one day I read an advertisement of Dr. Williams' Pink Pills, describing a case much like my own and I decided to try this remedy. I took the pills for about two months, and the result was wonderful. I gained fifteen pounds in weight and felt like a new man. I know of nothing that will build up the strength like Dr. Williams' Pink Pills, and I have since recommended them to many of my friends."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or direct from the Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box. Write today for a copy of the free booklet, "Building Up the Blood."

Northern Ireland now has two and one-half miles of highway to every square mile of land.

Use Minard's Liniment for the Flu.

Employees in German mines have increased in the past few years from 100,000 to 200,000.

An Oil Of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

"How's everything at home?"
"Oh she's all right."

Minard's Liniment for the Grippe and Flu.

Ship Muskrats To North China

Eight thousand live muskrats are to be shipped from the Swan Lake Fur Farm, Quesnel, B.C., this summer, it is stated by officials of the company. Three thousand are to go to North China and smaller numbers to England, Scotland, and other countries on the continent. The Swan Company estimates that it has a total of 50,000 rats on its farm.

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Canada's Mining Advance

From a comparatively obscure position in 1900 with a production of less than \$65,000,000, Canada is steadily advancing to the front rank of the mineral-producing countries of the world with a total production in 1928 valued at \$271,000,000.

The indications of worms are restlessness, grinding of the teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

The girl with a broken heart always manages to save the pieces.

Ready-Made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

Even a man of steel may lose his temper when he gets hot.

Minard's Liniment for Coughs and Colds.

At forty a man wishes he knew what he thought he knew at twenty.

Garnet Wheat Trial Shipment

Between 4,000 and 5,000 bushels of wheat has been shipped overseas, for trial in flour-making, under joint arrangements of the Dominion Department of Agriculture and the Canadian Wheat Pool. The future of this type of wheat will largely depend upon whether this present lot meets with favor among the millers of Great Britain and Germany.

GARDEN TIME

Poets and philosophers tell of the satisfaction obtained from cultivation of flower and vegetable gardens, but the practise is not as general as could be wished. In many places there is much less gardening than there was some years ago. People have too many things they want to do with their spare time.

In many cities and towns, however, the garden movement has been pushed as a community proposition. People have been urged, in a systematic way, to decorate their grounds with handsome shrubbery and flowers, and some of these communities have developed an amazing amount of this beautification.

Such towns become noted, and every minute of time put in on those flower beds is no doubt paid for in the highest value of real estate that is established in such a town.

Home pride is the motive that can best be relied upon to promote the gardening movement. People will usually do what their neighbors do. If you persuade one or two influential families on a street to spend a little more time and money beautifying their places this season, the majority of their neighbors would, within a year or two, fall into line and do the same thing.

As respects vegetables, the advantage of the back yard garden ought to be obvious in these times of high prices. The children of the modern community do not have enough share in the home tasks, and it would do them good to have some regular labors in a garden and they could well do a good deal of its work. But the old folks cannot expect them thus to labor unless they also are willing to do some stunts with the spade and hoe.

An exchange says that a newspaper that told the truth about people of its community would die of strangulation in two issues. We are skeptical about the fate of said newspaper, but there's not room for much argument about what would happen to its editor.

LOOKING FOR TROUBLE

The agitation led by the Hanna Fish and Game Association for the legalizing of Sunday shooting will no doubt bring volleys of vituperative bullets from Lord's Day Alliance headquarters, but for our part we are prepared to risk the wrath of the Blue Sunday fraternity so that the Hanna sharpshooters won't feel isolated.

We are not personally interested in bringing down game either on Sunday or week days, but if the Lord's Day Alliance can prove to us that it is any more sinful to knock out a few magpies or crows on the Sabbath than it is to do it on Monday morning, we are open to listen to the argument.

The elusive ducks and sundry other birds with roaming tendencies make their headquarters on Canadian soil during the summer months when they prosper and wax fat. In the fall they appear to have suicidal inclinations for they head for the United States where thousands of free citizens await their arrival and practise gang warfare on the feathered visitors.

The duck-shooting season is strictly limited in Canada, yet those who seek to enjoy this bloody form of recreation are prohibited from so doing on the one day when they can go shooting with an easy conscience. Surely it is not unreasonable to ask those members of the Provincial Government who play golf, tennis, poker or bridge on Sundays, or who are content to watch a baseball game on that day of rest, to amend the Game Act.

The exigencies of twentieth century commerce make it imperative for the trains to travel, mines and certain industrial plants to keep working and a thousand and one other activities to continue unabated on Sundays, yet to tempt even a speckled trout with a worm transforms an otherwise respectable citizen into a criminal overnight.—*Drumheller Mail*.

DIRTY AND WASHED EGG LOSSES

A study of egg marketing conditions at the present time reveals that dirty eggs are resulting in tremendous losses to producers. The egg regulations require that dirty eggs be graded as seconds and as the price of this grade is at least some five

cents a dozen below the grade of extras, it is easy to imagine the losses that are resulting.

Dirty eggs are a particularly vexing problem in the spring, although encountered to some extent to all seasons of the year. They result largely from hens being allowed to run in dirty yards and from failure to provide sufficient litter on the floors of the hen house and in the nests. These are conditions which can be corrected if the producer is anxious to receive the best possible price for his eggs.

Another practise which causes big losses in the egg trade is that of washing eggs. When an egg is washed the dampness penetrates the shell, carrying with it dirt and contamination. Under such treatment an egg spoils easily, especially when placed into storage.

Wiping eggs with steel wool will be found equally as efficient as washing, in removing dirt and far less harmful.

"THE PRINTER'S HOUR OF GENTLE PEACE"

Know ye the printer's hour of peace?
Know ye hour more fraught with joy,

Than ever felt the maid of Greece

When kiss'd by Venus' am'rous boy?

'Tis not when round the mazy case

His nimble fingers kiss the types;

Nor is it when, with lengthened face,

The study devil's tail he gripes.

'Tis not when news of dreadful note

His columns all with minion fill;

'Tis not when brother printers quote

The effusions of his stung-avorn quill.

But oh! 'tis when the weather's clear,

Or clad in hail, or rain, or vapor,

He hears in accents soft and clear—

"I'm come to pay you for the paper"

Fresh Water Tiger

5 pound muskie captured by G. Clark of Toronto after an hour's fight with a light rod and nine pound test line

Fishermen differ as to the fighting merits of the various species of the finny tribe to be found in North American waters. Some claim that, inch for inch and pound for pound, the small mouth black bass is the gamest fish that swims; others are equally enthusiastic in praise of the speckled brook trout; while still another fraternity claim that the salmon puts up as noble a battle for liberty as any game fish extant. All are agreed, however, that the muscalunge, sometimes called the "fresh water tiger" is one of the greatest fighters known to anglers, and that he will put up a battle royal when attached to the business end of a rod.

One of the productive muscalunge streams in North America is French River, in Ontario, Canada, which connects Lake Nipissing on the East with Georgian Bay on the West. This tangle of waterways is not only the haunt of the fighting muscalunge but it

yields small and large mouth black bass, great northern pike of enormous size and pickerel in abundance, as well as pan fish. Not long ago a prominent New York business man landed a 55 pound "muskie" after a battle which will probably satisfy his quest for a thrill for the rest of his life.

French River is two hundred miles north of Toronto on the Sudbury Line. The French River Bungalow Camp, a series of cozy individual bungalows centering around a main club house, provides comfortable accommodations for the angler and his family. Jack Strathdee, manager of this anglers' retreat, is a genial host who is glad to give the uninitiated fisherman a few tips on how to lure the wily "muskie." French River Bungalow Camp has as its adjunct Pine Rapids Camp, some 20 miles up the river, and located just at the spot where the "whoppers" are likely to lurk.

PROOF OF DYES is in the dyeing!

Words won't dye a dress, or coat, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five times more anilines than any other dye—by actual test.

It's the anilines in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that redyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Has Only Three Streets

English City Is Probably Smallest In the World

St. Davids, in Pembrokeshire claims to be the smallest city in England, perhaps in the world. It is a village of three streets, containing barely a hundred houses, but it is technically a "city."

Although St. Davids is 16 miles from a railway it is a popular holiday resort, owing to its gem of a cathedral and its rugged cliff scenery.

BABY'S OWN TABLETS WIN GREAT PRAISE

Many Mothers Always Keep Them In the House

Thousands of mothers state that they knew of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donat Ploudre, Tingwick, Que., writes: "I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lady in library: "Have you been reading Longfellow?"

Roughneck: "Now, only about ten minutes."

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The pupils of the schools should be thoroughly sold on the idea that they have a definite part in the work of cleaning up and painting up. Many a father will reward his boy handsomely for having the cleanest and neatest backyard in the neighborhood.

The girls will find a new delight in putting the flower beds in order, washing the woodwork, and otherwise helping mother to make the entire interior spick and span.

Every yard should have the weeds removed. The lawns should be mowed and raked, the shrubbery pruned, the hedges trimmed, and all rubbish carried away or burned.

If there are any little depressions in the yard which accumulate water, fill them up. A pool of stagnant water a foot square can easily give birth to a swarm of fever carrying mosquitoes.

Spanish Cream

1 1/2 cupfuls Borden's St. Charles Milk diluted with 1 1/2 cupfuls of water.

1/2 teaspoonful salt.

1/2 cupful sugar.

3 eggs.

1 1/2 tablespoonfuls granulated gelatin.

1 tablespoonful vanilla.

Let the gelatin stand in the milk for five minutes, then scald the mixture. Combine the egg-yolks, sugar and salt with the scalded milk, and cook until slightly thickened like a custard. Then stir the mixture into the egg whites beaten stiff; add the vanilla. Turn into individual moulds which have been dipped in cold water and when set unmould and serve with light cream, or any preserved fruit.

Austria produced in the past year nearly 15,000,000 pairs of shoes.

The Cost Of Corrosion

In a paper read before the Institution of Civil Engineers, by Sir Robert Hafield, on "The Corrosion of Ferrous Metals," the startling statement was made that, according to his estimates, 29,000,000 tons of steel were lost by rusting in 1920. At 20 pounds a ton this would represent for the year the huge bill of 580,000,000 pounds, to which might be added another 120,000,000 pounds spent on operations rendered necessary by the corrosion. These figures refer to the whole world, but, as the "Electrical Review" pointed out, the major part, say 450,000,000 pounds would probably have to be debited to the British Empire, a sum equal to nearly half our total war indebtedness to the United States.

SUNDAY SCHOOL LESSON

APRIL 28

THE SUFFERING SERVANT OF JEHOVAH

Golden Text: "With His stripes we are healed."—Isaiah 53:5.

Lesson: Isaiah 52:13 to 53:12.

Devotional Reading: Revelation 5:9-11.

Explanations and Comments

The Servant Of Jehovah.—Who is meant by the term? In the words of the Ethiopian eunuch (Acts 8:34), "Of whom speaketh the prophet this? of himself, or of some other?" Philip, to whom the eunuch spoke, immediately took up the passage which we study today, and from it preached Christ.

Incidental allusions to the Servant of Jehovah are scattered throughout the second part of the Book of Isaiah, but the main passages are these: 41:8-20; 42:1-7, 18-25; 43:5-10; 49:1-9; 50:4-10; 52:13 to 53:12. What was the conception in the mind of the prophet? Was the "Servant" a personification, or a person? If a personification, was he the Israelitish nation as a whole, or the best portion of that nation—the righteous nucleus? The exiles in Babylon, or that part who remained loyal to Jehovah throughout all the trials of the exile and thus kept alive the true religion? If a person, was he ideal, or real? A prophet, or Ezekiah, or Jehoiacham? Or was he one still to come, the promised Messiah? Each of these interpretations are ably defended by scholars.

"The very name 'servant' sets up a standard of life for individuals and nations. Those who would be great must become the servants of all. Jesus Christ is the only perfect illustration of altruism. Selfishness is the curse of the world. Christ brought help because he was the perfect 'Servant' of Jehovah, consecrated to unselfish service. And servanthood and service must characterize every life that ministers to the health and strength of humanity."—John T. McFarland.

The Later Exaltation Of The Servant of Jehovah, 52:13-15.—In these last three verses of the fifty-second chapter of Isaiah, God is represented as the Speaker. (In 53:11, 12, He again speaks.) Behold, he exclaims, my "Servant," he who executes my will, shall deal so wisely as finally to be exalted. But just as many were astonished, because they could not understand His sufferings, His visage and form disfigured by disease; so when he is exalted he shall startle many nations, kings shall be silent with surprise when he is really known and understood. ("The word 'sprinkle' is difficult and obscure and perhaps not original. The Greek version reads 'many nations will marvel at him.'")

The Servant Of Jehovah a Man Of Sorrows, verses 1-3.—The prophet is now the speaker. "Whenever a 'we' is suddenly introduced into prophecy, it is always Isaiah that speaks, since the prophet takes the nation along with himself," Delitzsch. Who hath believed our message, and to whom hath the arm of Jehovah been revealed? He refers seemingly to the revelation which he has made in the past, the substance of 42:1-4; 49:1-6; 50:4-9. "The tenses in verses 1-3 are past (prophetic perfect), the future being viewed as already accomplished. The implied answer to the question is 'No one.'"—Dummelow. The "arm of Jehovah" is a figure of speech for the work of Jehovah; the sending of the "Servant" is his work.

He was despised, and rejected of men; a man of sorrows, and acquainted with grief. "What an liad of woes is condensed into these words!" And as one from whom men hide their faces he was despised; and we esteemed him not. Men turned their faces away from Him with loathing. Many see in these words a suggestion of leprosy, and refer to Job. 16:6.

Why Cement and Plaster Need Painting

It is seldom one sees a cement, concrete, stucco, plaster or brick surface painted. It seems to be the general assumption that these substances are amply able to protect themselves from weather and other destructive conditions.

But that is a mistake. It is well known that cement is a moisture absorbent, and it isn't true that the moisture does not harm it. It is almost as important to prevent rain from penetrating the surface of these rough mineral outsiders as it is to protect wood and iron from rain.

But just any kind of paint will not do. It must be a special cement paint having a chemical composition not affected adversely by lime or alkalis.

It is important that owners of commercial and manufacturing buildings, grain elevators, residences, garages, silos, etc., with absorbent outside surfaces, should realize the advantages of painting them—that they will last longer, look better and need fewer repairs after being so treated.

Many accidents happen from warming varnish and other mixtures that contain inflammable liquid. Almost every day it happens. "Happens" does not seem to be the best word to use, however, for it is discovered that such "accidents" (another wrong descriptive word), are usually the result of want of common horse sense.

Anybody should know that to place highly inflammable substances like turpentine and benzine by a hot or even warm stove is more than likely to cause an explosion. "She was heating a pot of varnish on the stove and it exploded." Of course it did; did she think it would simply boil over, like a pot of soup?—Painters' Magazine.

The Part Paint Plays

"Where poverty lives, there filth abounds." Someone wrote or said that a long time ago and it is quite true today. The solidity and prosperity of a town, or its poverty and shiftlessness, are indicated by its physical appearance.

"Paint and Pride Are Partners," is one of the slogans of the "Clean-up and Paint-Up Campaign," and it is a good one. "The greatest incentive to cleanliness is paintiness," is another true one.

Any community cleaning that lasts requires the paint brush even more than the scrub brush. Walls and other surfaces which are properly painted, enameled or varnished, are washable. They are easier to keep clean.

Good paint and varnish reduce the labor of keeping clean, promote health, inspire pride of ownership, multiply the joys of living and increase property values. There is no better time to paint up than when you are cleaning up, and there's little hope of keeping your premises cleaned up unless they're painted up.

Pictures and Mirrors Give Finishing Touch

Pictures serve an admirable purpose in the decoration and furnishing of the small home.

By the very nature of their location on the wall they occupy none of the floor space that is so valuable in the small dwelling. If a little room has been rather crowded with furniture, pictures on the wall carry the eye upward and bring the attention from the lower part of the room to the upper, where there is a greater appearance of space.

Then, too, the subjects of the pictures may be chosen with a view to increasing the apparent size of the room. Pictures with a rather deep perspective give the eye a feeling of looking into the scene, down a corridor, into a valley, along a river, or otherwise creating an appearance of distance.

To do this removes much of the cramped feeling that invades a small room overcrowded with furniture.

The choice of color in pictures also will have much to do with the decorative scheme of the room, and the same effect of spaciousness can be created with the judicious use of mirrors.

CHAPTER XVIII.—Continued.

"Come in," she called.
Donald followed Wainwright, his heart-beats peculiarly accelerated. For an instant he could not distinguish objects in the dim interior. Then his eyes rested on Connie, sitting demurely in the corner. She wore a gingham dress of blue, with white collar and cuffs. A dark belt was fastened snugly at her slender waist. Tiny high-heeled shoes peeped from below the hem of her skirt. Her beautiful hair hung down her back in a huge braid that fastened at the nape of her slim, round neck with a narrow black bow. She rose and crossed the room to meet him, her high heels making her lithe little body appear much taller. There was something fragile about her beauty, some of the colour gone from her cheeks, and just a hint of shadows under her eyes.

Donald held out his hand. "Good evening, I'm glad to see that you are better," he said awkwardly.

A slender, warm hand crept timid-

ly into his, and his fingers closed on it gently as on a flower. He stared down at her, thrilled by her loveliness. She raised her eyes with their bewilderingly long lashes slowly to his face. With a sudden leaping of his heart, Donald realized that he was in love.

They talked desultorily while Connie sat timidly on the edge of the uncomfortable chair. She could not feel at ease in the high, narrow shoes and the enveloping skirts. And as she essayed to cross the rough floor with an assumed air of ease, her ankle turned and she would have fallen had not Donald caught her in his arms.

As he raised her to her feet she blushed furiously, and he fancied he could feel the warm beating of her heart. With an embarrassed apology, she slipped from him, crossed to the table and lighted a candle. And presently he took his leave, Wainwright walking with him down the darkening trail.

Wainwright was in one of his brooding moods. For a few minutes he was silent. As they neared the bluff he spoke.

"After witnessing my daughter's distress the morning of the race I am afraid that you feel harshly toward me for allowing her to be placed in such a humiliating position. You have been exceedingly kind to us; therefore, I feel that I should relate the circumstances which have placed me in my present position. As I told you that day, I have allowed my pride to withhold from my daughter her inherited rights. I will be as brief as possible.

"My father, who took great pride in the family name, planned a political career for me even from the day of my birth. By natural taste and temperament I was quite unfitted for public life. I must have been a great trial to him, as from early boyhood I evinced a great love for the study of botany and ornithology. He would go into a red rage when he found me in the garden studying flowers under a microscope or stalking birds in the shrubbery.

"At college I was not a success, either socially or in my class. Always of a retiring nature, I did not enter social life or college sports, and the course of study set for me by my father bored me extremely.

"During my third year at college I met Connie's mother. Until that time no woman had entered my life, although my father had hinted his plans for my marriage as soon as I had finished my course.

"To me any flower shop, however small acted as a magnet. One day I stood gazing in the window of a tiny florist's shop on the Strand. A girl was kneeling among the flowers, and as she lifted her head our eyes met. She was like a golden lily. Her hair was like Connie's hair, and the blue of her eyes was the blue of the pansies she held in her hand. And her name was Constance."

He paused for an instant.
"Her father, who had been a rector in a small parish in the south of England, died just previous to our meeting, leaving his motherless child without kith or kin. Lest I weary you I may say briefly that we were married. My father would not even grant me an interview, but wrote to me saying that marrying as I had done had barred me forever from his door. I did not care. I was happy—completely, supremely happy. I sold a small estate bequeathed to me by my mother, and we set out for British Columbia.

"Ah!" he breathed softly, "that voyage! We could not afford it, but we travelled first-class—it was our honeymoon and we were young. We had never been to sea before, and the novelty of it all wove a spell about us. As we walked the deck we talked joyously of our wonderful future in the mysterious Great West.

"Our first year in Vancouver was one of blessed content. There is no love that could be greater than ours. Clerical work was scarce, so I took any job that offered. I would come through all kinds of weather she home black with coal-dust or white with lime, and my wife would cry out merrily as she threw herself into my arms. We turned our hardships into jests."

A smile of infinite tenderness played about his eyes as memory recalled the golden days with the woman he loved.

"The next winter I was taken grievously ill. I lay helplessly on my back while my tender wife tramped

BOTHERED WITH ECZEMA 2 YEARS

Itched and Burned. Formed Eruptions. Healed by Cuticura.

"I was troubled with eczema on my hands, limbs and feet. It began with an itching and burning and later formed sore eruptions. The irritation was so bad that I could hardly stand it. It bothered me for two years.

"I tried different remedies but they all failed to help me. I began using Cuticura Soap and Ointment and got relief. I continued the treatment and now I am completely healed."

(Signed) Mrs. Alvah McKinnon, Tatamagouche, N. S., Sept. 27, 1928.

Clear the pores of impurities by daily use of Cuticura Soap, with touches of Cuticura Ointment as needed to soothe and heal. Cuticura Talcum is fragrant and refreshing.

from house to house teaching painting and music. Day after day made her daily rounds to keep us in the bare necessities of life, and pay the doctor's bills."

Wainwright's voice sank and almost failed him for a moment. Recovering himself, he resumed his story.

"She would come home at night, tired and worn, to fall asleep in a chair by my bedside, while I raved in a fever. She went without food to buy dainties for me. She never lost her cheery smile—but it killed her. She died giving birth to—to—Constance."

Tears rose to his eyes, and for a moment he covered them with his hand. With a great effort he continued.

"I became embittered, changed completely out of any semblance to my former self. I cursed my father. I cursed the world. I would have welcomed death, but as I looked down at the tiny mite by my dead wife's side, I knew that I must fight to live.

"A short time after, I received from my father a letter in which he asked my forgiveness. I was unfitted to make my own way in the world, yet my father had turned me

brutally away. My wife had died from overwork and lack of food. I wrote to him in a black rage a letter that must have scorched his soul.

"For four years I eked out a miserable existence in the City. My health broke down again, and my doctor warned me that I must get to a higher altitude. I learned of this place, turned everything into cash, and came here, bringing Connie with me.

"My sole income has been derived from writing articles on Nature for the newspapers and magazines. Several times my father has advertised in the newspapers, asking me to return. I read of his death two weeks ago. For Constance's sake, I am going to start for England tomorrow."

Wainwright's head drooped listlessly as he concluded his story. All energy, all strength of bearing, seemed to have gone from him. The bitter remembrances he had voiced had brought a look of mental anguish to his face. He stood staring mutely before him.

(To Be Continued.)

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brousseau, Magog, Que., writes:—"For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Employer—"Can you show a recommendation?"

Job Applicant—"Why, er-er, I was recommended to mercy by a jury once!"

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. Miss E. L. Doxey, graduate nurse, of 3220 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

Zam-Buk

Risks Not Great

The chance of being killed through a railway accident on a British railway in 1927 was 36,000,000 to one. One passenger was killed for every 36,000,000 carried.

Minard's Liniment prevents Flu.

An odorless onion is cultivated by the Chinese.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

Beware of the man whose story sounds too good.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

The average velocity of wind in Philadelphia is 10 miles per hour.

Minard's Liniment

At the first sign of it. Its Healing Qualities are Amazing. THE OLD RELIABLE.

How far would you go to be sure of a better Oil-?

Knowing that a better oil means smoother performance, longer life, greater economy and bigger trade-in-value for your car, you'd probably go a long way to be sure of a better oil.

That's what Imperial Oil Limited did—went all the way to tropical South America for the crude out of which to refine Marvelube.

There's lots of crude oil available right at Canada's front door. If Canada's largest and most modern refineries had been able to evolve as good an oil as Marvelube from locally available crude they would have been glad to do so. Peruvian crude made a purer, carbon-free, fuller-bodied oil—an oil that meant better lubrication—so Peruvian crude was decided upon.

The decision set a new standard in motor oils. Aircraft operators, the most particular buyers of oil, are enthusiastic about Marvelube because it has given them a longer period of operation between engine overhauls, and a greater margin of safety.

You can enjoy the same benefits in your car, and there is a grade of Marvelube that is refined to meet the exact requirements of your car. Consult the Marvelube chart at good service stations and dealers everywhere.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

**PRAIRIE FIRES CAUSE
MANY SERIOUS LOSSES**

Several serious prairie fires in the southern part of the province have resulted in considerable destruction of farm property as well as grass on the ranges. It is pointed out by Benj. Lawton, Provincial Game and Fire Commissioner, that those who find it necessary to set fires should take precaution to prevent it from escaping, and anyone driving through the country should refrain from throwing lighted matches and live cigar of cigarette stubs away before they are extinguished.

The burning of stubble on grain fields in the past has resulted in considerable damage from fires which have been allowed to escape. It is considered that the long stubble and straw left on grain fields where combines have been used may prove to be an even greater menace where this is burned preparatory to ploughing. It would be well for all who find it necessary to burn stubble of this kind to take special precautions in addition to those provided for by the Prairie Fires Act.

Where burning is to be done at any season of the year for the purpose of destroying stubble, straw or brush, or where it is considered necessary to utilize fire for the clearing of land, a fire guard is required, and the fire in every instance must be watched by three adult persons, equipped with suitable appliances for the extinguishing of fire, and the fire must be watched and guarded until it has been extinguished. A fire guard must be provided before kindling any such fire and must be ten feet wide if burning is to be done before May 7th, and 20 feet wide if it is to be done after that date.

Curate—Do you believe in dreams, Willoughby?
Willoughby—I used to, sir, but I don't now.
"And why not?"
"I married one five years ago."

**ALBERTA LAMBS TOP AMERICAN
MARKET**

Selling at 17 cents per pound, a shipment of 820 winter fed lambs from the flock of Albert Green, Taber Alberta, recently set a high figure on the market at Buffalo, New York. In view of the highly satisfactory returns amounting to over \$12,000 received for this consignment, further similar shipments are anticipated to Buffalo and other Eastern American Markets where the demand for Canadian lambs is reported to be exceptionally good.

**HERE'S NEW LIGHT ON
JONAH'S 'WHALE'**

Here is one for the fundamentalists and modernists to chew on. W. H. Malkin, addressing the Canadian Club in Vancouver on his tour of the world referred to his visit to Nineveh. "At this place I was told that the whale that swallowed Jonah was not a whale, if you know what I mean," said Mr. Malkin. "They told me the old name of Nineveh was 'The Whale.' It was the 'Paris' of the east and Jonah went there and metaphorically speaking 'went on a bust.' He disappeared for three days and when he came back he was very repentant and set out to complete the task that was laid upon him. "That is what I was told at Nineveh and it is what the people of that part of the world believe about Jonah and the whale."—Kitsilano Times.

**JURIST'S ERROR SENDS MAN TO
JAIL FOR 82 YEARS**

CEDAR RAPIDS, Iowa.—An error by a feeble jurist in making out his commitment papers caused Clark Randall to be sent to prison for 82 years, where he had been sentenced to from one to 15 years. The error is about to be corrected and Randall has been promised a pardon this week. Randall already has been in prison 11 years, far longer than his correct sentence should have detained him. But Judge Milo P. Smith, who sentenced him, wrote "consecutively" where he should have written "concurrently." The youth, who was then 37, was found guilty on six counts of forgery. Judge Smith died several years ago at an advanced age.

Snicklefritz -----

Jack was telling wen in town a few days ago about a sign in a music store which reads: "Kiss the Girl You Love", and many others just as good."

The flower of youth uses the dough of old age to get college bred.

When Adam in bliss,
Asked Eve for a kiss,
She puckered her lips with a coo;
With looks quick ecstatic,
She answered emphatic
"I don't care Adam, if I do!"

Tramp (at back door): "I don't know where my next meal is coming from."

Hard Hearted: "Well, this is not an information bureau."

An American lawyer was sitting at his desk one day when a Chinaman entered.

"You lawyer?" he asked.
"Yes. What can I do for you?"
"You good lawyer?"
"I hope so."
"How much you charge if one China man killum 'nuther Chinaman to get him off?"
"Oh, about \$500 to defend a person accused of murder."

Some days later the Chinaman returned and banged down \$500 on the lawyer's desk. "All right," he said, "I killum."

**Who Does Your
Printing?**

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
